

We own a resort just outside of Ely and for years we have wanted to build a new large cabin for our guest to enjoy. After contacting a few local contractors, we chose Kovall Construction to handle the project and we are so happy we did. Mark sat down with us to discuss the layout and made some awesome recommendations and overall layout improvements. As usual, we had a budget to work with and a deadline that the cabin had to be complete. Throughout the entire phase of the cabin build, Mark and his crew worked with us to customize the plans and make some great changes. The crew was enjoyable to work with and each of them took great pride in their work and were also very professional; not to mention they keep a clean jobsite. We really enjoyed getting to know Mark and his crew and look forward to having them back to do another project as well as some pulled pork sandwiches. Thanks for the awesome new cabin!
